GOLDEN BULLET MICROPHONE

The Golden Bullet is an extremely powerful condenser microphone. Due to its convenient size and versatile attachment directly to the instrument, it can be used with a wide variety of instruments, such as congas, hand drums, drums and percussion, string instruments with non-internal mounting like upright bass, cello, or ethnic instruments with sound holes.

The Golden Bullet Microphone has a sturdy 5" gooseneck built into the cable, right behind the microphone capsule. This allows for a variety of positions.

An integral part of this microphone is its preamp. It provides transformer-less pre-amplification plus an active balanced XLR output. The preamp works on either phantom power or a 9-volt battery. This

preamp also provides the special 5-volt power the mic requires.

Upon customer request, we can supply an electronic control box with 1/4" instrument line output (especially for combo amplifiers). This special unit does not work with phantom power, only with a 9-volt battery. If you would like this version, please contact us.

Technical Data

Frequency Range: 20 - 17,000 Hz

Sensitivity: 7 mV/PA/1 kHz

Maximum SPL: 139 dB

Polar Pattern: Unidirectional

Output: XLR active balanced or 1/4" line level (please choose model)

Mic Power Supply: 5 Volt through Supplied Golden Bullet preamp

Preamp Power Supply: 9 Volt battery or 12-48 Volt phantom power (phantom power XLR type only)

Unidirectional Polar Pattern
